pemonides@gmail.com

I'm a full stack software engineer, I have 5+ years experience with backend and mobile development. I would like to keep working on subjects like DevOps, mobile, on languages like C# or Python.

Experience

Since 2016

CTO at 360Boost Paris

2years Full Time

*Technical-lead, conception, planning, development and deployment of **C# Android/IOS app, NodeJs Servers**. Managment of Clusters on **Gcloud, Kubernetes, Ansible**. Team-lead with 4 employees.(1500 Users, B2B + B2C)*

360Boost is a native IOS/Android app, developped with Xamarin.Forms, I did the conception, development on this app. Then I had to lead 2 Interns and 1 employee in the next steps of development. 360Boost is also a B2B solution with a React WebApplication, I managed one React Developer in the development and deployment. The backend is a NodeJS Rest Server developed with Express. I did all the developments steps, from conception to Cluster deployment on Google Cloud using Kubernetes and Ansible

2015

Mobile Consultant, Docaposte Paris

6 months FullTime

***Android/Java Developer**. Sent to a major client of Acensi Docapost, I worked on a solution for Digitizing contracts. During this experience I used technologies as **Digital Signatures, SSL**. I had to develop on Java/Tomcat servers, as well as mobile applications on **Java Android**.*

2014-2015

Consultant, Acensi Paris, La Défense

1.5 years Fulltime

***C# WPF .Net4.5** development for a Finance Banquing software, Eurocaution. I became team-lead for this project (15 developers, 3 teams). 2Weeks Sprints, daily stand-up meetings, sprint retrospective etc...*

*Then **C# Xamarin** Mobile development on a para-medical application. Triacys. I worked on a custom Android Kernel for BeagleBoard, then Android Tablets. I also developped custom userspace-drivers for devices like blood pressure monitor. (2 developers). Agile management Method with client review meetings.*

2012

C++ developer, Sogeti High Tech Rennes, France

6 months

***C++/QT** Developer for an IHM testing solution Takt Engine. I had to extend the capabilities of the testing solution. I worked with **OpenCV** to detect Bad Artefacts during Tests*

2010

Lua GameDeveloper, White Birds Paris, La Défense

6 months

Lua Developer for Point-and-click games, Cardboard Castle. Last King of Africa
