pemonides@gmail.com

I'm a full stack software engineer, I have 5+ years experience with backend and mobile development. I would like to keep working on subjects like DevOps, mobile, on languages like C# or Python.

Experience

- Since 2016 **CTO at 360Boost Paris** 2years Full Time
*Technical-lead, conception, planning, development and deployment of **C# Android/IOS app, NodeJs** Servers. Managment of Clusters on **Gcloud, Kubernetes, Ansible**. Team-lead with 4 employees.(1500 Users, B2B + B2C)*
Mobile App
Backend B2B
Api Server
- 2015 **Mobile Consultant, Docaposte Paris** 6 months FullTime
***Android/Java Developer**. Sent to a major client of Acensi Docapost, I had to develop on Java/Tomcat servers, as well as mobile applications on **Java Android**.*
- 2014-2015 **Consultant, Acensi Paris, La Défense** 1.5 years Fulltime
***C# WPF .Net4.5** development for a Finance Banquing software, Eurocaution. I became team-lead for this project (15 developers, 3 teams). 2Weeks Sprints, daily stand-up meetings, sprint retrospective etc...*
*Then **C# Xamarin** Mobile development on a para-medical application. Triacys. I worked on a custom Android Kernel for BeagleBoard, then Android Tablets. I also developped custom userspace-drivers for devices like blood pressure monitor. (2 developers). Agile management Method with client review meetings.*
- 2012 **C++ developer, Sogeti High Tech Rennes, France** 6 months
***C++/QT** Developer for an IHM testing solution Takt Engine. I had to extend the capabilities of the testing solution. I worked with **OpenCV** to detect Bad Artefacts during Tests*
- 2010 **Lua GameDeveloper, White Birds Paris, La Défense** 6 months
Lua Developer for Point-and-click games, Cardboard Castle. Last King of Africa
