I'm a full stack software engineer, I have 5+ years experience with backend and mobile development. I would like to keep working on subjects like DevOps, mobile, on languages like C# or Python.

Experience

Since 2016   **CTO at 360Boost** Paris   2years Full Time

*Technical-lead, conception, planning, development and deployment of **C# Android/IOS app, NodeJs** Servers. Managment of clusters on **Gcloud, Kubernetes, Ansible**. Team-lead with 4 employees.(1500 Users, B2B + B2C)*
360Boost is a native IOS/Android app, developped with Xamarin.Forms, I did the conception, development on this app. Then I had to lead 2 Interns and 1 employee in the next steps of development. 360Boost is also a B2B solution with a React WebApplication, I managed one React Developer in the development and deployment. The backend is a NodeJS Rest Server developed with Express. I did all the developments steps, from conception to Cluster deployment on Google Cloud using Kubernetes and Ansible

2015   **Mobile Consultant, Docaposte** Paris   6 months FullTime

***Android/Java Developer**. Sent to a major client of Acensi Docapost, I worked on a solution for Digitizing contracts. During this experience I used technologies as **Digital Signatures, SSL**. I had to develop on Java/Tomcat servers, as well as mobile applications on **Java Android**.*

2014-2015   **Consultant, Acensi** Paris, La Défense   1.5 years Fulltime

***C# WPF .Net4.5** development for a Finance Banquing software, Eurocaution. I became team-lead for this project (15 developers, 3 teams). 2Weeks Sprints, daily stand-up meetings, sprint retrospective etc...*
*Then **C# Xamarin** Mobile development on a para-medical application. Triacys. I worked on a custom Android Kernel for BeagleBoard, then Android Tablets. I also developped custom userspace-drivers for devices like blood pressure monitor. (2 developers). Agile management Method with client review meetings.*

2012   **C++ developer, Sogeti High Tech** Rennes, France   6 months

***C++/QT** Developer for an IHM testing solution Takt Engine. I had to extend the capabilities of the testing solution. I worked with **OpenCV** to detect Bad Artefacts during Tests*

2010   **Lua GameDeveloper, White Birds** Paris, La Défense   6 months

Lua Developer for Point-and-click games, Cardboard Castle. Last King of Africa

Side Projects

Since 2018	**Cryptocurrency exchanges arbitrage bot**	Personal projet

*Part of the **Python** development team. Retrieve the orderbook/tick data of different exchanges through websockets for analytics.*

Since 2017	**Rentfirst.nl** (Co-Founder)	Startup

Rental housing aggregator for the Amsterdam area.
*Main coder on the development of a **NodeJS REST API** for the back-end. I also worked on an IOS/Android application listing the offers*

Since 2017	**Team-Geny** Mobile Developer	Startup

Creating Mobile applications using Xamarin/JavaAndroid

Since 2014	**EpicBacon** Main-Developer	Personal projet

*Main developper of EpicBacon. During my freetime I develop mobile applications and web solutions using **Unity3D** and **Java/AndroidSDK**. I also do 3Dmodeling with 3DsMax for 3Dprinting*

Skills

Daily Usage: C#, JavaScript/NodeJS, Python
Mobile Development, Xamarin.Forms/Android, WPF, Google Cloud
Occasionally: Java, Go, C, C++
Unity3D, Azure
Deployment: Ansible, Kubernetes, Docker, Git Workflow
Databases: MongoDb, ElasticSearch, PostgreSQL, MySql
Systems: Nginx, (Arch)Linux/*Bsd
Misc: Jira, Mantis, LaTeX, Gimp, Photoshop, 3DSMax
Certifications: 70-483 Programming in C#
Languages: French native, English fluent

Education

2013-2014	**Master's degree** Computer science	Epitech European Institute of

Information Technology, Paris
Project-oriented pedagogy : around 40 projects achieved alone or within a team.

2012-2013	**Student exchange program** Mobile&Game development

계명대학교 Keimyung University, Daegu South Korea

2009–2012	**Bachelor** Computer Science Programming and software design

Epitech, Rennes

2006–2009	**French Baccalauréat ES.** with honors.	Lycée Schœlcher,

Fort-de-France
Specialization in mathematics

Activities Thai boxing, Underwater diving, 3D Modeling, Drawing, Skating, MotorBike
